Admin Activity Logger
Magento Extension Guide

Admin Activity Logger

OVERVIEW

Admin activity logger is an **open-source Magento module developed by Commerce Bees**. The primary focus of the module is to monitoring the admin user activities. so that we can monitor the every admin user activities and also find the modified contents.

FEATURES

This module have the menu section for the admin log details in the admin panel.

Back End

- ➢ Admin activity logger –> Activity log details.
- ➢ System -> Config -> Admin log configuration -> Admin log manager.

INSTALLATION

It is highly recommended to back up your files and database before installing this module. Commerce Bees are not responsible for any adverse effects. It is recommended to install this module in a test environment for initial testing, before implementing the same in your live environment.

- Extract the zip folder *(if not installed via Magento Connect Manager)*

- Copy the **app** folder and paste it in your site's document root

- Merge the files when asked

- Clear your **cache**

- Logout from the **admin** and login again

CONFIGURATION

After installing the module, you should see the additional field highlighted in the screen shots if you are using default Magento theme.If you need any support regarding this, please feel free to write to us at commercebees@ameexusa.com.

In magento admin, you will have two different tabs and two different section.

- One will be at the end of the menu section(along with the Dashboard,Sales,...Admin activity logger).

- Another one will be the System -> Configuration Section,that lets you to Enable/Disable to this feature.

If you get 404 error, Please logout and login again

Settings for admin activity logger :

You should enable the admin logger in magento admin(System -> Configuration -> Admin log configuration -> Admin log manager ->Enable/Disable the field).

You can specify the number of days you want to maintain the log. (System -> Configuration -> Admin logger configuration ->Admin log manager -> Set the value for the text field after X days)

If there are two or more store admins ,say a master admin can make the module "Admin activity logger " be no longer availble to the other admins.
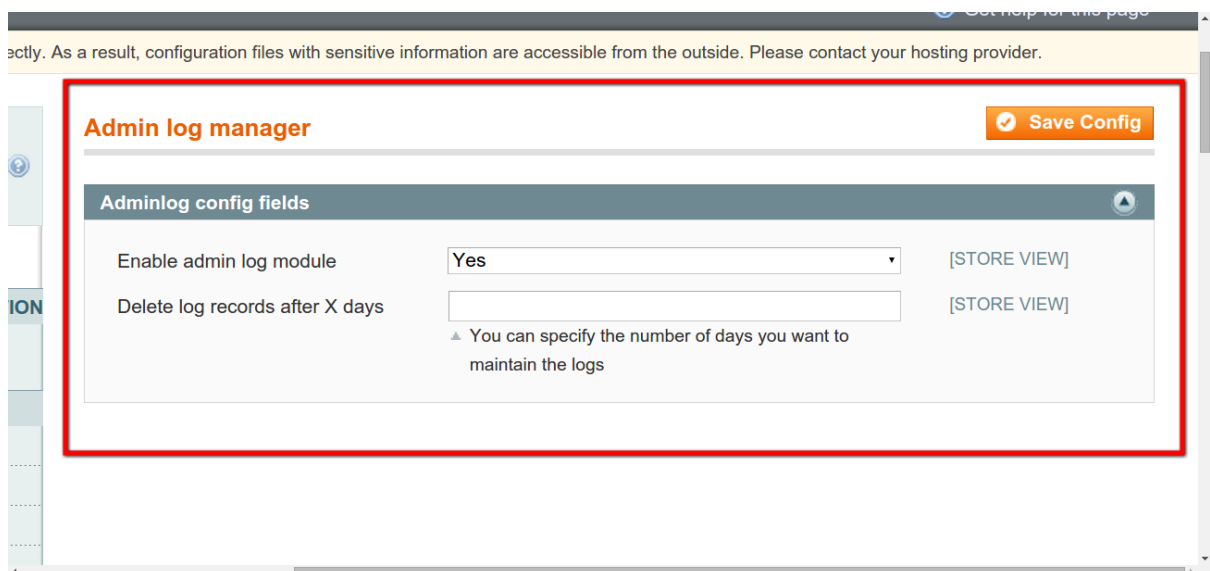

To do so, follow the steps below,

➢ Go to the system - > Permissions - > Roles .

➢ Select the user to whom you don't want to give access.

➢ Role Resources Select the "Custom" for resource access section.

➢ Un select the admin activity logger module for that user.
